PEACHES AND NECTARINES

Bred and Tested in New Jersey

A Typical Early Yellow Freestone

Propagated and Distributed by

THE NEW JERSEY PEACH COUNCIL, INC.

NEW BRUNSWICK, N. J.

Fall, 1952 - Spring, 1953

EARLY VARIETIES RIPENING BEFORE HILEY

↙ **MAYBELLE (N. J. 164)**

A medium to large, white-fleshed peach ripening a few days before N. J. 133 and about one week before Red Bird. It is as hardy or hardier than Elberta. It is of good quality for such an early peach. It is a semi-cling under most conditions and as firm as other very early varieties.

↙ **CHERRYRED (N. J. 129)**

A large, round, non-melting yellow-fleshed clingstone which ripens a few days before Red Bird. The flesh is orange-yellow, deeply stained with red. It can be picked and handled much the same as Red Bird. This variety is essentially an early attractive yellow-fleshed Red Bird.

↙ **EARLY EAST (N. J. 134)**

A medium to large, yellow-fleshed peach. It ripens about ten days before Golden Jubilee. The fruit develops red color while still firm and in long distance shipping condition. The dormant fruit buds are hardier than Elberta. Tree-ripened Early East are freestones. It has hardness, productiveness, and good quality.

↙ **JERSEYLAND (N. J. 135)**

This large, firm, attractive, yellow-fleshed freestone ripens almost a week before Golden Jubilee. It hangs well to the tree, and is an excellent shipper. It is far superior to Golden Jubilee as a commercial variety. The tree is hardy, sets fruit buds freely, and comes into bearing early.

↙ **RARITAN ROSE (N. J. 97)**

A firm, attractive, white-fleshed freestone of good quality, ripening a few days before Golden Jubilee. The tree is vigorous, hardy, and productive. The best early white for the roadside trade.

↙ **WILDROSE (N. J. 118)**

The best white-fleshed freestone to follow Raritan Rose. The fruit is large, round oval, well colored with red, and has a clear white flesh of high quality.

↙ **ENVOY (N. J. 102)**

An attractive, yellow-fleshed freestone, ripe with Triogem. It is of medium size, only moderately firm and has good quality. It is excellent for freezing. Envoy has proven to be a profitable peach in Canadian orchards and is recommended as a local market variety for northern peach growing areas.

↙ **TRIOGEM (N. J. 70)**

A firm, yellow-fleshed freestone of high quality, ripening two to three days later than Golden Jubilee. Very attractive and a good shipper. An excellent commercial variety to follow Jerseyland.

↙ **NEWDAY (N. J. 79)**

A firm, bright, attractive, yellow-fleshed peach of good quality, ripening with Triogem. It is larger than Triogem and resistant to bacterial spot.

↙ **SUNHIGH (N. J. 82)**

A large, firm, attractive, yellow-fleshed variety of good quality ripening a few days earlier than Golden East. Generally it is a freestone, but sometimes the firm flesh adheres slightly to the pit when the fruit is hard ripe. A popular commercial variety. Not recommended for planting where bacterial spot is severe.

↙ **REDROSE (N. J. 98)**

A firm, highly-colored, white-fleshed freestone of high quality ripening with Golden East. The trees are vigorous, productive, and hardy.

MID-SEASON VARIETIES

➤ **GOLDENEAST (N. J. 87)**

A very large, firm, attractive, yellow-fleshed freestone of high quality ripening about two weeks before Elberta. An excellent variety to follow Sunhigh.

➤ **SUMMERROSE (N. J. 101)**

The best large, oval, white-fleshed freestone to follow Redrose in New Jersey. The fruits resemble well-colored Belle of Georgia in shape and appearance, but are firmer, larger, and earlier.

➤ **SUMMERCREST (N. J. 94)**

A large, oval, yellow-fleshed freestone ripening just before Elberta. A popular home canning peach. The tree is vigorous and hardy. An excellent variety to precede Elberta.

➤ **WHITE HALE (N. J. 63)**

A large to very large, white-fleshed freestone of good quality ripening with Elberta and J. H. Hale. The tree is more vigorous than J. H. Hale and the flowers are perfect. It meets the demand for a large, showy, white-fleshed peach during the Elberta season.

LATE VARIETIES RIPENING AFTER ELBERTA

➤ **AFTERGLOW (N. J. 84)**

A large, high-quality, yellow-fleshed freestone ripening immediately after Elberta. The trees are vigorous, hardy, and productive. An excellent variety to prolong the Elberta season. Susceptible to bacterial spot.

➤ **LATEROSE (N. J. 109)**

This is a white-fleshed freestone ripening a few days after Elberta and White Hale. Hardy, productive and attractive. It has high quality for canning and freezing as well as for slicing fresh.

➤ **GOODCHEER (N. J. 152)**

A large, bright, attractive, yellow freestone of good quality, ripening about a week after Elberta. A promising variety to prolong the Elberta season. Susceptible to bacterial spot.

➤ **CONSTITUTION (N. J. 161)**

A large, yellow-fleshed, freestone of high quality ripening a week to ten days after Elberta or about with Goodcheer. It combines some of the fruit size of J. H. Hale with the flavor and tree size of Late Crawford. It rates high for canning.

➤ **FALLATE (N. J. 183)**

An attractive, white-fleshed freestone peach of high quality and good size, ripening a week to ten days after Elberta or about with Goodcheer and Constitution. It is a promising white peach to follow Laterose.

➤ **AUTUMN (N. J. 145)**

The latest, large, yellow freestone ripening fully ten to fourteen days after Elberta. Later than Late Crawford, or Rio-Oso-Gem. The tree is a very vigorous grower and should be planted on well-drained, good peach soil.

➤ **FROSTQUEEN (N. J. 185)**

A white-fleshed, freestone peach ripening about a week after Fallate and at least two weeks after Elberta. An excellent white peach to follow Fallate. It should ripen before the first frost in northern New Jersey during a normal season.

NECTARINES

➤ **NECTAROSE (N. J. 9)**

A large, white-fleshed freestone, ripening just before the Garden State, or about with the Sunhigh peach.

↘ **GARDEN STATE**

A large, firm, yellow-fleshed freestone of high quality ripening with the Goldeneast peach. It is very desirable for slicing, canning, and freezing.

↘ **NECTAHEART (N. J. 10)**

A large, white-fleshed freestone completely shaded with red, ripening immediately after Garden State. Some specimens grown at New Brunswick have been over 2½ inches in diameter.

↘ **NECTACREST (N. J. 8)**

This large, attractive, white-fleshed freestone, usually ripens with the Summercrest peach at New Brunswick or about one week after Nectaheart.

↘ **NECTALATE (N. J. 4)**

This is the latest variety to ripen among all the nectarines offered by the New Jersey Peach Council. It usually ripens with the Afterglow peach, or nearly two weeks later than Nectacrest.

LOW ACID PEACHES

Low acid peaches should be of special interest to persons who are troubled with hyper-acidity or peptic ulcers, since they may be eaten by such persons without the discomfort that follows the consumption of fruits having a normal amount of acid.

Trees of two low acid varieties of peaches developed at the New Jersey Agricultural Experiment Station have been named and are now being offered by the New Jersey Peach Council. Both varieties ripen a few days after Elberta.

↘ **HONEYGEM**, yellow freestone.

↘ **NEWCHEER**, white freestone.

GRADES AND PRICES, FALL 1952—SPRING 1953

Subject to change without notice.

GRADE	1 to 9 <i>trees</i>	10 to 24 <i>trees</i>	25 to 99 <i>trees</i>	100 to 249 <i>trees</i>	250 to 499 <i>trees</i>	Over 500 <i>trees</i>
18 to 24 inches.....	—	—	\$0.70	\$0.55	\$0.45	\$0.35
2 to 3 feet	—	—	.75	.60	.50	.40
3 to 4 feet.....	\$1.50	\$1.25	.85	.70	.60	.50
4 to 5 feet.....	1.50	1.25	.85	.70	.60	.50
5 to 6 feet	2.00	1.50	1.25	1.00	—	—

These prices include truck delivery to some central point in New Jersey, such as Moorestown, Hammonton, or Glassboro, if the number of trees ordered makes such delivery practical. Trees also may be secured at the C. H. Steelman Nursery on the Clarksville-Port Mercer Road, about one-quarter mile from State Highway Route 26, or U. S. Route 1. Telephone Princeton 1-2525. Small shipments to distant points, including all orders for less than 25 trees, will be sent by express collect unless otherwise specified on the order blank.

PLACING ORDERS

All orders for trees should be sent to the New Jersey Peach Council, Inc., R. D. No. 3, Princeton, New Jersey. Orders for Fall delivery will receive first consideration.

A deposit equal to 10 per cent of the total cost of the trees is required with each order and the balance before delivery.
